

Hard Working. Easy Cleaning.

Our IP69K rated stainless steel gear unit features rugged high-quality 304 stainless steel that meets NSF/3-A material and construction guidelines for conveying applications.

MOVIFIT® is the next generation in scalable, flexible decentralized control for standard IP65 or high pressure IP69K washdown environments.

The ASEPTIC^{US} is a IP69K rated gear motor that features a smooth-bodied, easy clean, Totally Enclosed Non-Ventilated (TENV) motor.

Our Food Industry Option Package is a standard drive system that's been customized with components that meet basic food industry requirements.

Our NEW stainless steel gear unit

New Food Industry Solutions from SEW-EURODRIVE

In harsh, wet and demanding processing environments, only the tough survive. Maintaining 24/7 productivity and stringent hygienic standards is critical. That's why SEW-EURODRIVE offers a rugged and reliable range of products and integrated solutions that stand up to the rigorous uptime demands and high washdown pressures of the food industry. From berries and bottling to meat and poultry processing, SEW has solutions that are tailored to meet your specific application challenges in hygiene, performance and price.
